

Please do not take away the normal FM stations that are regional like KLOVE. The impact that it has had on our community has been one that is long over due. The local station here caters to the younger generation. KLOVE has been able to fill in with the older generations where the other station can not. With KLOVE coming in and working across the nation they have been able to pool resources and place much needed positive and encouraging messages on the air waves. Being in the lower band most stations in the small towns and even in many big ones are not able to support that station financially as required by the FCC. With stations such as KLOVE the listener community supports the whole. This in turn enables the smaller communities to have a quality radio station and not have to pay as much. The void that KLOVE fills here would not be able to be filled by a LPFM broadcaster. It has been proven in our market time and time again. I am sure that if you were to look you would find this to be true in many communities across the country. Please stop and think about what you are looking to do. Thank you for your time and please listen to the people who are out here day in and day out with the stations you are looking to affect.
